Senior Frontend Engineer with 10 years of experience building web and mobile applications at scale. Expertise in React, server-driven UI architecture, and leading cross-functional teams.

TypeScript · React · GraphQL · Server-Driven UI · Java · A/B Testing

## EXPERIENCE

---

### LinkedIn

Sunnyvale, CA

Senior Software Engineer

Sep 2022 – Sep 2025

- Led frontend development for LinkedIn Premium across web, iOS, Android, and mobile web, serving millions of subscribers globally
- Early engineer on the company-wide migration to server-driven UI architecture, reducing client-side complexity and improving feature deployment velocity
- Managed cross-functional projects with 5+ engineers, collaborating closely with design, product, and data science to ship high dollar impact features
- Drove experimentation strategy through A/B testing, analyzing user behavior data to optimize conversion and retention metrics
- Received the org-wide Culture Champion award 2x for spearheading a culture committee that organized numerous events for 100+ employees

Software Engineer

Nov 2019 – Sep 2022

- Built core Premium experiences for web, including the My Premium page, cancellation flow, welcome onboarding, and subscription reminder emails
- Led organization-wide WCAG accessibility compliance initiative, achieving Grade C certification across Premium surfaces
- Established frontend coding standards and best practices for a new mobile web repository adopted by 20+ engineers
- Mentored multiple interns and junior engineers; served as oncall lead monitoring production deployments and code health

### Adobe

Lehi, UT

Web UI Software Engineer

Aug 2015 – Feb 2019

- Developed major product features for Analysis Workspace, including anomaly detection and contribution analysis visualizations using React
- Built comprehensive test coverage using Jasmine, Enzyme, and Cypress for unit, integration, and end-to-end testing
- Partnered with product managers and designers on rapid iterative prototyping to validate new feature concepts

## EDUCATION

---

### Carnegie Mellon University

2011 – 2015

B.S. in Statistics, Minors in Computer Science and Music

## SIDE PROJECTS

---

### Recipesaurus · [recipesaurus.ai](https://recipesaurus.ai)

May 2025

Collaborative recipe and cookbook sharing app with Cloudflare D1 database for data management, comprehensive integration testing, and responsive design. Built with Claude Code.

### A+J Music Recordings · [a-j-music.com](https://a-j-music.com)

Nov 2025

Built a custom audio player web app for piano recordings featuring track navigation, playback controls, and volume management. Developed using Claude Code.

### FootballPlayerMaker · [poe.com/FootballPlayerMaker](https://poe.com/FootballPlayerMaker)

Oct 2025

AI-powered image generation app that transforms user photos into Premier League player portraits. Built entirely through prompt engineering.
